Getting a License File for LMS

Download and Install LMS

Download LMS from below URL and install:

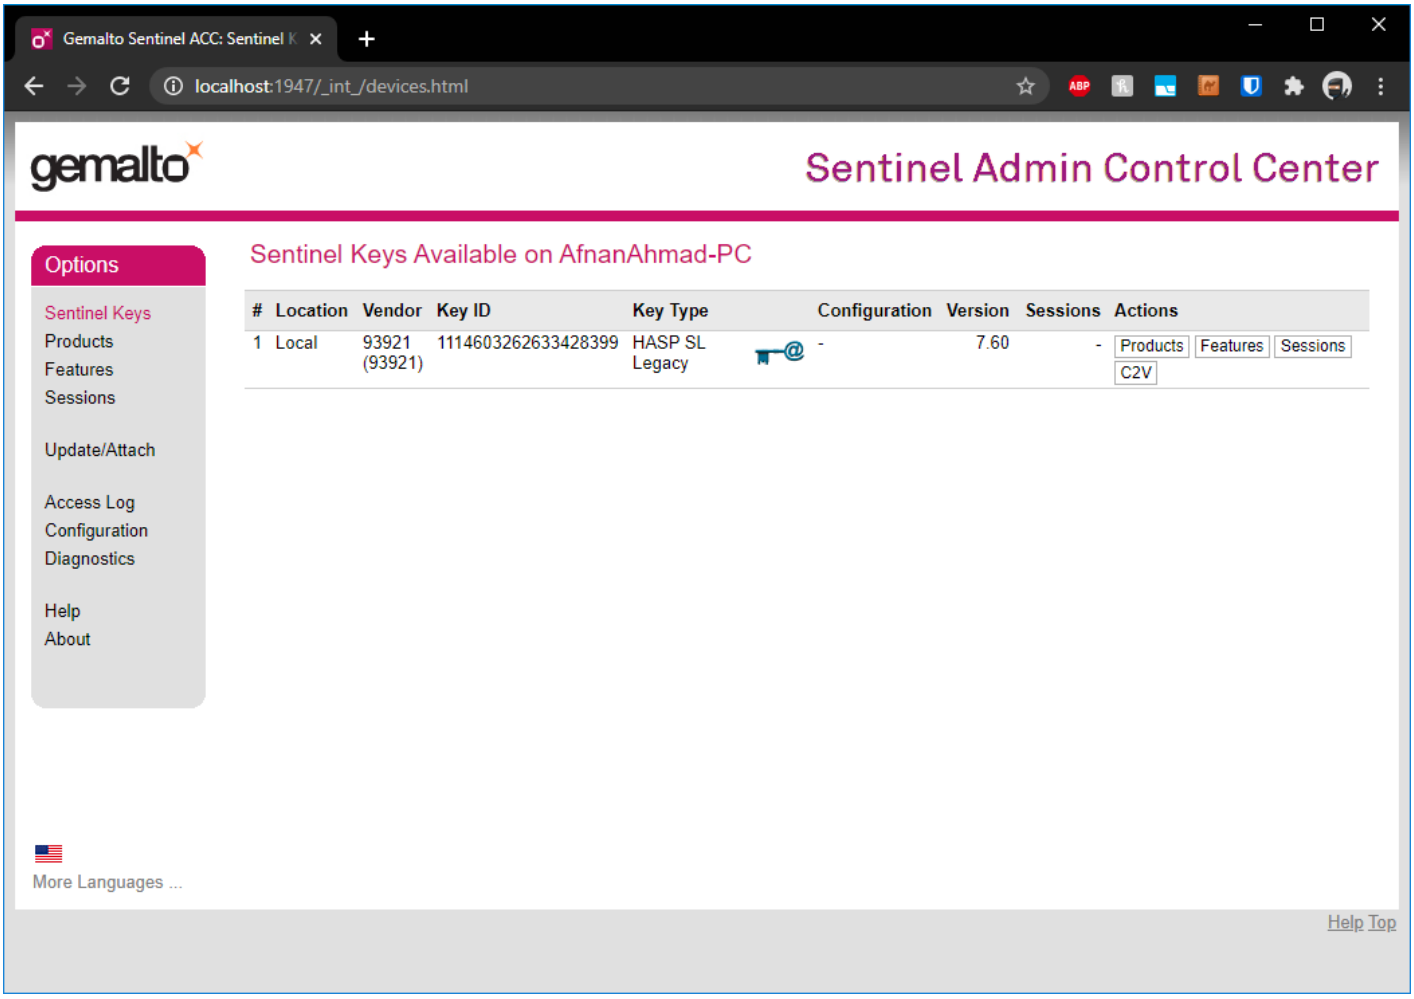

https://gofile.me/48l9w/ZePa9uYGl

You can get file password from me through email or MS Teams.

Getting a Detached License

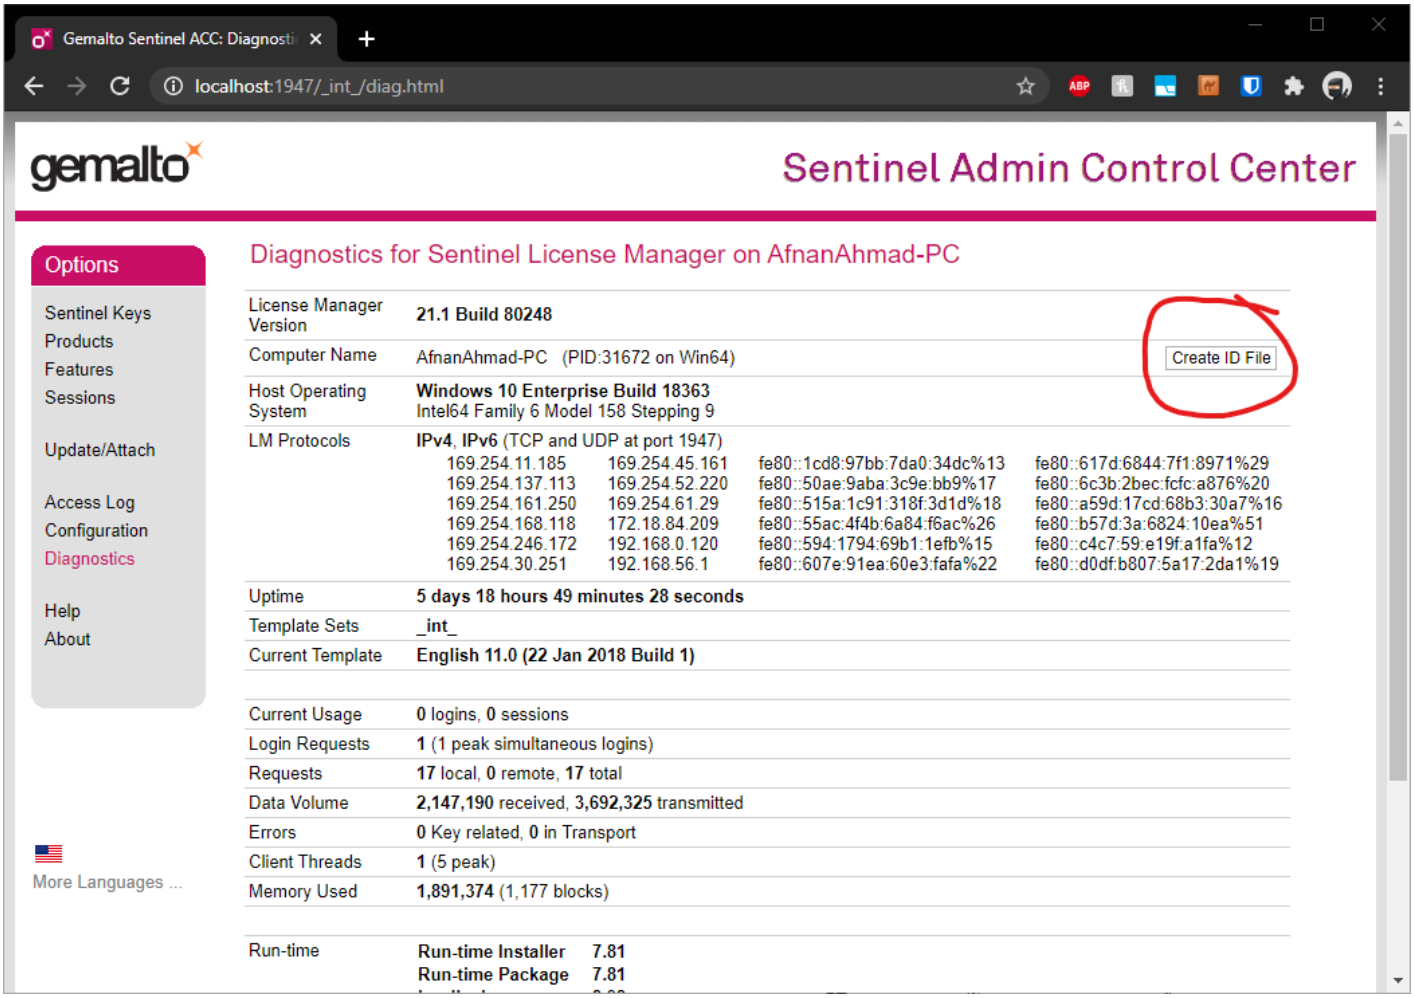

Step 1

Open the Sentinel HASP Admin Control Center (http://localhost:1947/)

Step 2

Create a file containing the machine identity by clicking **Create File ID** in the Diagnostics page of the HASP License Manager on your machine.

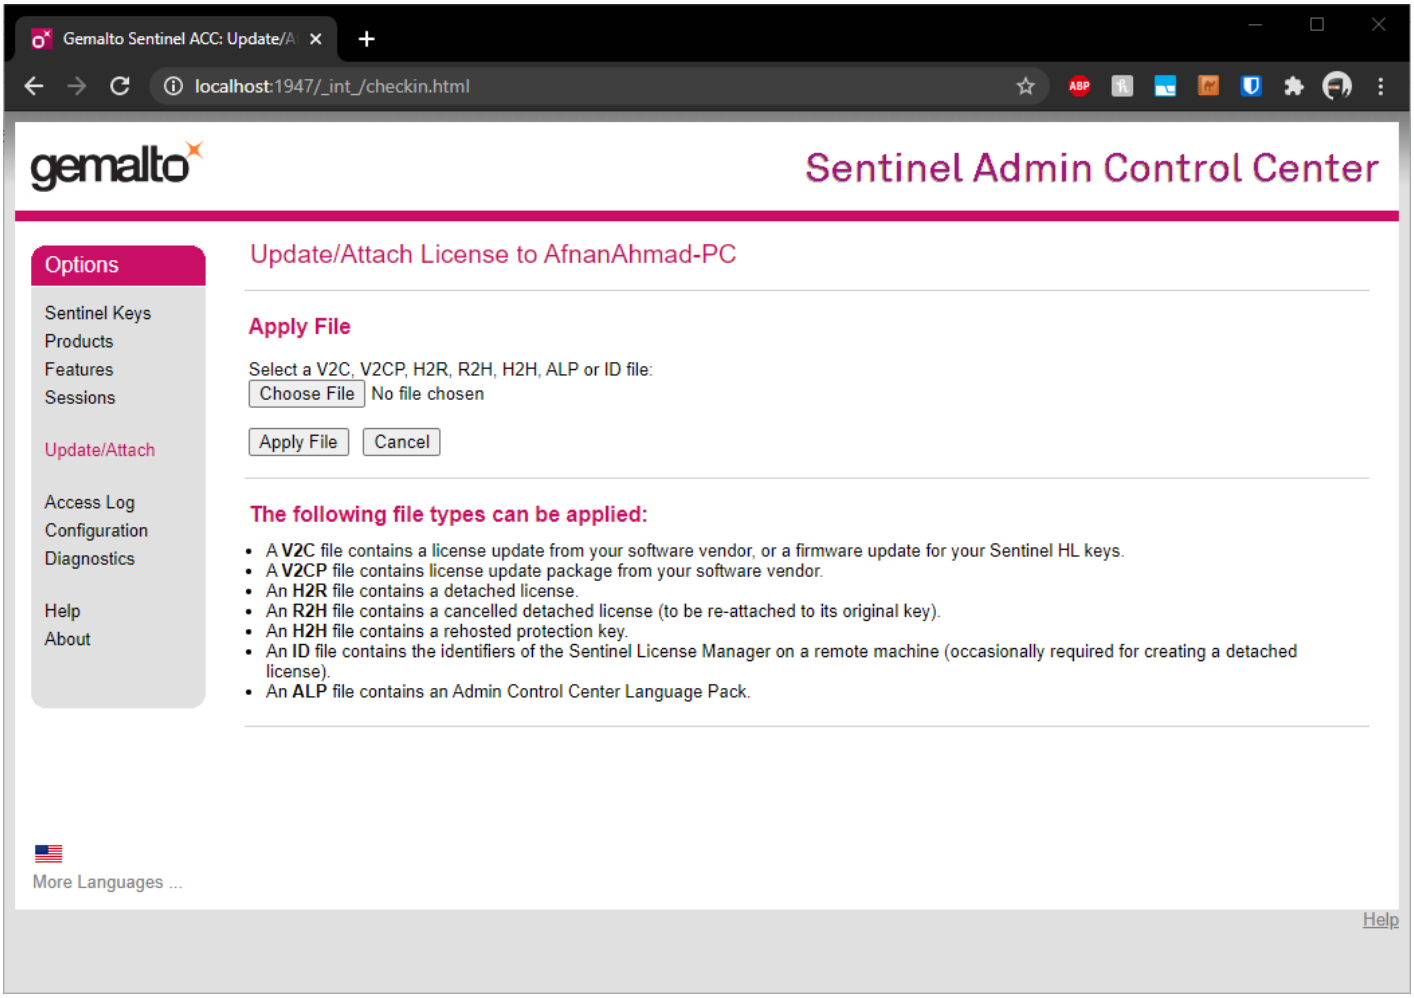

Step 3

Upload your ID file on below URL. I will create a detached license and share an H2R with you.

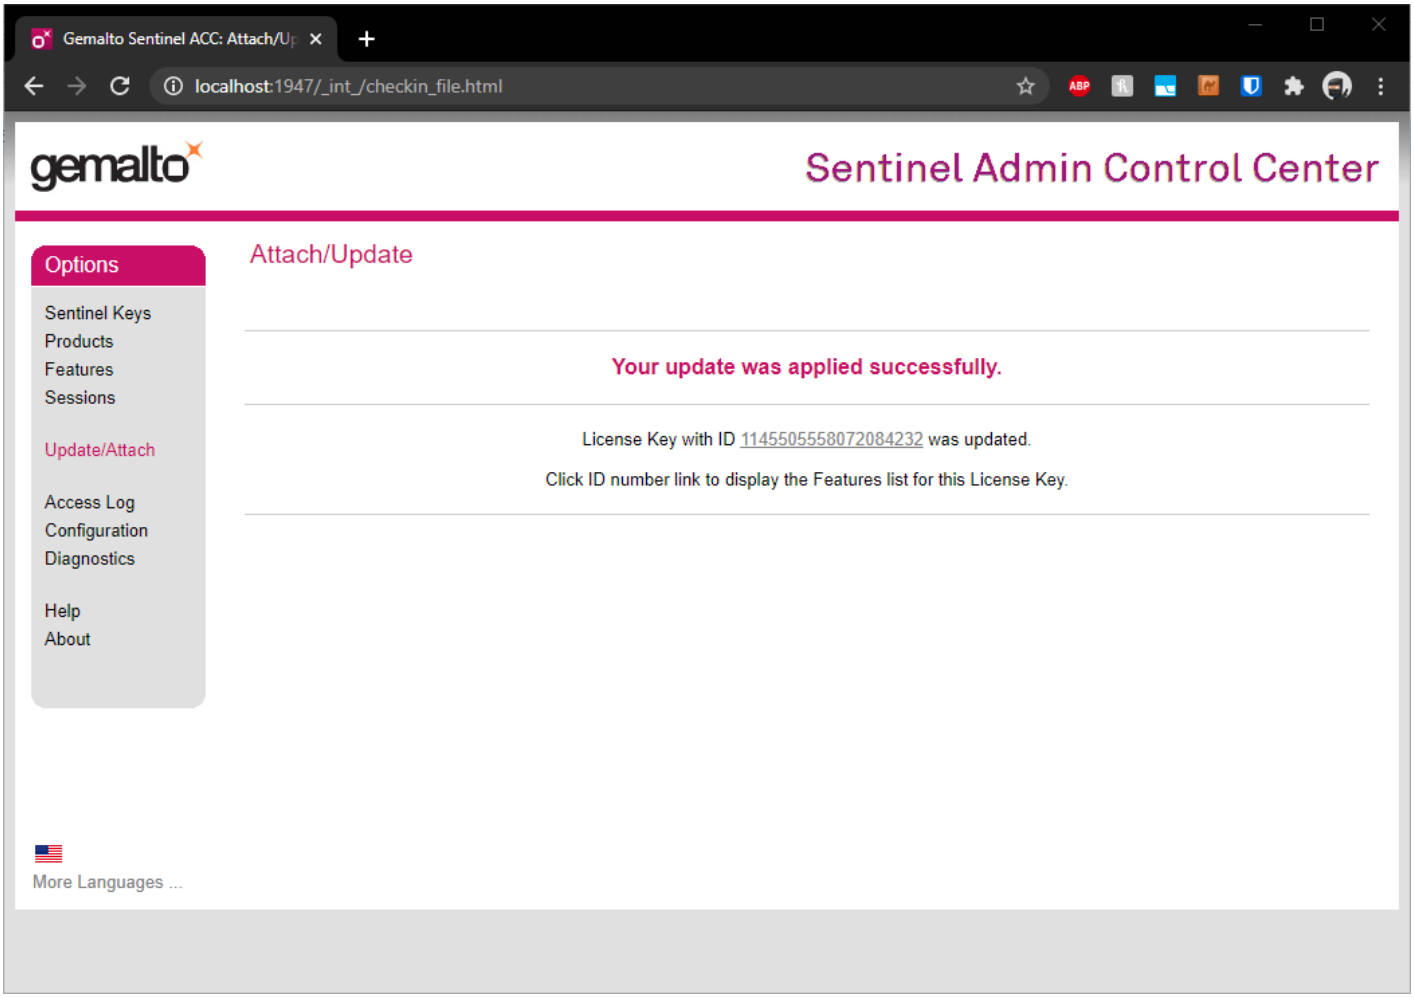

https://pse312-nas.eng.yorku.ca:5001/sharing/1tEiPTU5e

Step 4

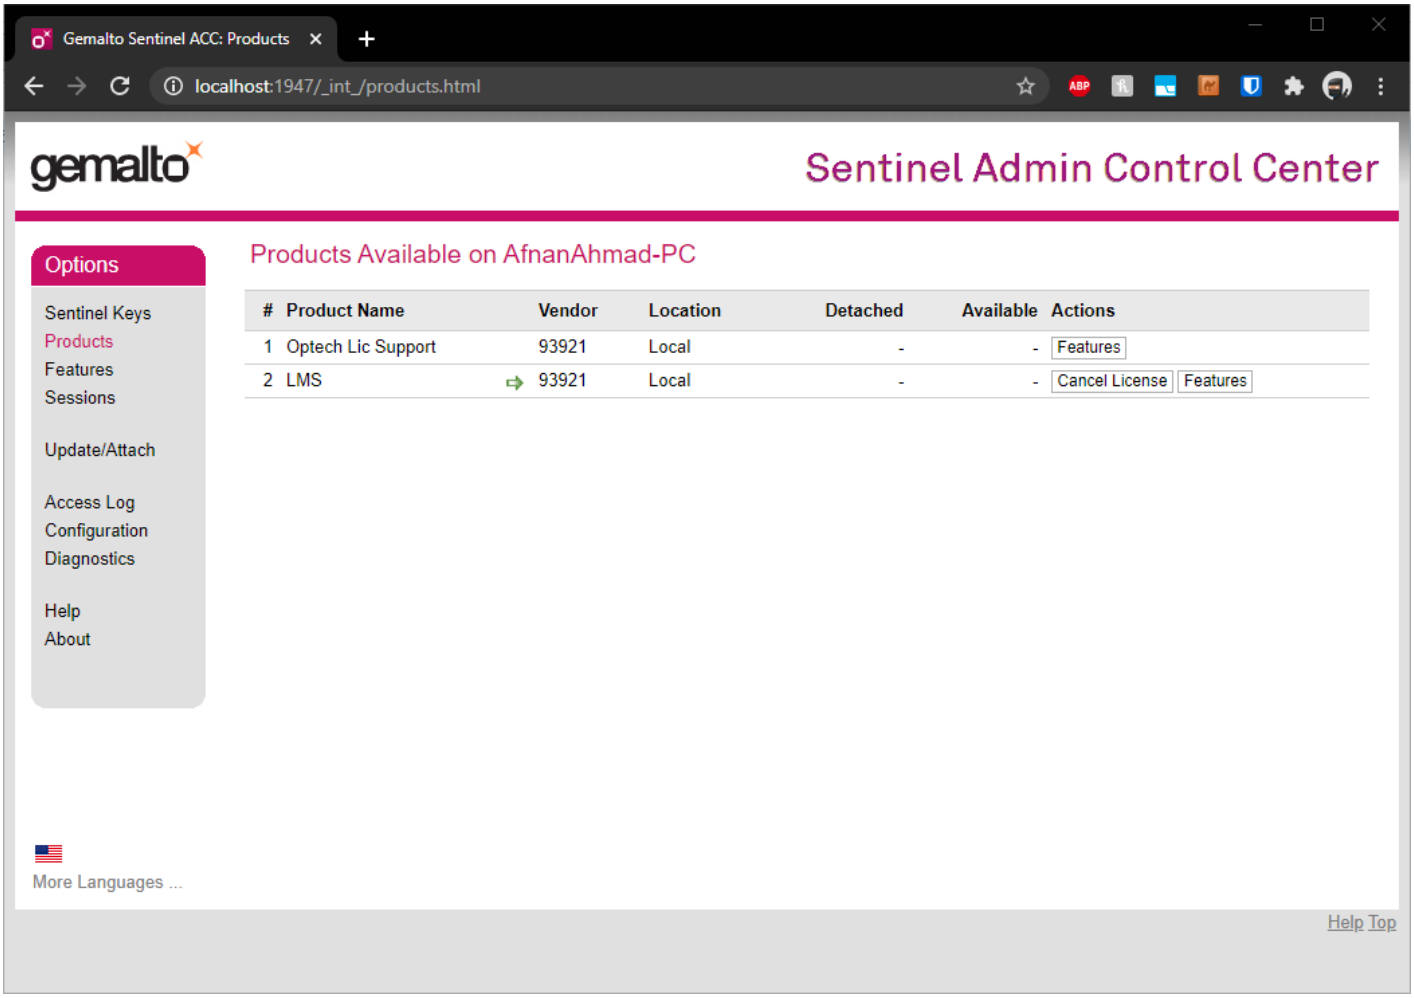

On the **Update/Attach** panel, hit the **Browse** button and select the file detached license file (H2R file). And hit **Apply File**.

If succeeded you will see message like this.

Then you can see LMS in the **Products** panel. After this you can run your LMS program and it should work as intended.
