TerraScan

- Getting a License

Getting a License

In order to use TerraScan and TerraModeler, you need a license from Network Server. For accessing the server, you need a VPN, this guide will help you setup ZeroTier VPN and License Manager.

Install ZeroTier:

Download and install ZeroTier client: https://www.zerotier.com/download/

Join ZeroTier Network:

Network ID: **8056c2e21c031f7d**

After joining network, send email to Afnan to get your device approved before connecting to license server.

Download and Install TerraScan

- Download required software from following url: http://gofile.me/5i8Zf/PappkDV3b
- Install TerraSolid License Manager from following zip file: *terra-solid_license-manager.zip*
- Install TerraScan and TerraModeler from following zip file: *terra-ms_ce_eng_022_011.zip*

Acquire a License

1. Launch *Terra License Manager* from *C:\terra64\license*
2. Use following configuration
   - **Server:** 172.25.78.115
   - **Access Code:** ausmlab-terrasolid
3. Select *TerraScan* and *TerraModeler* from the list
4. Go to *License* Menu from top bar and select "Get from server.."
